

Dear Parents,

This summer we are contemplating a program aimed at helping children of 4 to 9 years ages to have variety of experiences. These experiences would be helpful for children & parents to ~~learn~~ learn to speak English and it would provide an opportunity to meet other children in the community. It is hoped that learning experiences could be provided by means of ~~in~~ trips to interesting places, playing games, and other ways.

For a such program to be successful it would depend upon co-operation, full support and active participation. Would you be interested to take part in such a program.
